DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17 and 25, drawn to an electrophysiology system, classified in class 600, subclass 523.
 - II. Claims 18-24, drawn to a method comprising acquiring, storing, and transmitting an image of the heart, classified in class 600, subclass 523.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as acquiring the image in any lab of a hospital, other than a radiology lab, using any external or remote medical imaging system known in the art. Also, the apparatus as claimed can be used to practice another and materially different process such as transmitting the image over a wired network.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 3762

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
